

INSTRUCTION MANUAL

---

# Elin bed.

## INTRODUCTION

---

Thank you for purchasing the Elin junior bed. For safety reasons, please read the assembly instructions carefully before starting to assemble this product.

Check the contents of the package before the product is assembled. A complete summary of the contents of the package can be found on the following pages. In the unlikely event you are missing something, please contact the dealer who sold you the product.

This product takes about 10 minutes to assemble. It requires 1 person to assemble the bed.

This package contains small parts, that must be kept away from small children.

A hex key must be used to assemble the bed. This is not supplied along with the bed.

## ATTENTION

---

For the sake of your child's safety, we recommend you to regularly check that all screws and bolts are tightened so that the bed cannot slide apart. Retighten if necessary. Also check that there are no loose screws or other small items, that the child can snag or swallow.

- A Warning; Be aware of the risk of open fire and other sources of strong heat, such as electric bar fires, gas fires, etc. in the near vicinity of the cot;
- B Warning; Do not use the cot if any part is broken, torn or missing and use only spare parts approved by the manufacturer;
- C Warning; Do not leave anything in the cot or place the cot close to another product, which could provide a foothold or present a danger of suffocation or strangulation, e.g. strings, blind/curtain cords;
- D Warning; Do not use more than one mattress in the cot.

## CARE AND MAINTENANCE

---

All products are affected by sunlight – even the most colourful and colourfast products can fade. Therefore, protect the product from direct sunlight.

Wood is a sturdy and living natural material. The structure and colours change during the life of the product due to the continuous transformation process the wood goes through. Wood adjusts to its environment, so avoid placing the product in a room where the humidity fluctuates and always protect the product against powerful heat sources such as radiators, fireplaces and so on because this could affect or at worst destroy the structure of the wood.

Clean varnished wood products with warm soapy water and a damp cloth. Always use a soft cloth to avoid scratching, and always wipe off with a slightly damp cloth. Never use abrasive cleaning agents, bleaches or sharp objects
